

Together we can, we will

INTERNATIONAL CONFERENCE

**on Earthquake Engineering
and Post Disaster
Reconstruction Planning**

25-27 April 2019, Bhaktapur, Nepal

CONFERENCE PROCEEDINGS

SECTION 1

S.N.	ID	Title	Page
1	1006	Comparative Study on the Properties of Coarse Aggregate being used in Kathmandu Valley	1
2	1012	Volume of loose materials and the analysis of possibility of blocking and dam break triggered by debris flows in Zhamunong gully	7
3	1016	Study of Non-Linear In-Plane Behavior of Traditional Masonry Wall of Nepal Using the Simplified Micro Modeling Technique	16
4	1017	Analysis of Abutment Foundation Using Conventional Method and FEM Model	25
5	1023	Contraflow Evacuation Planning Problems for Disaster Management	31
6	1024	Preliminary Results of Skew-Log-Logistic Distribution, Properties and Applications	37
7	1027	After The M 6.9 2011 Sikkim Earthquake the Retrofitting Policy and Measures for the Historic Monasteries in Sikkim, India.	44
8	1033	Estimation of V_{s30} by the HVSr method at a site in the Kathmandu Valley, Nepal	52
9	1041	Effect of Setback on Fundamental Period of RCC Framed Structure	61
10	1043	Comparative Study of Physical and Mechanical Properties of Traditional and Modern Brick	71
11	1046	Site Specific Ground Response Analysis of Bhaktapur City	76
12	1058	Behaviour of Waste Concrete Debris in Concrete	90
13	1060	Corrosion of Rebar and Earthquake Vulnerability	96
14	1061	Estimation of A 3-D Velocity Model of the Kathmandu Basin for Ground Motion Simulation	102
15	1062	Importance of Orientation of Structure in Seismic Performance	109
16	1071	Numerical Investigation of The Sliding Response of Flexible Structures Founded on Adeformable Granular Layer	116
17	1074	Condition Assessment of Bhairavnath Temple after 2015 Gorkha (Nepal) Earthquake	126
18	1083	Physical and Mechanical Properties of Bamboo Species in Nepal	134
19	1085	Strategy of Cumulative Absolute Velocity for Earthquake risk Assessment of Concrete Gravity Dam	141
20	1089	Risk Perception of People using Streets Occupied with Buildings under Shoring.	151
21	1090	Physical Performance of Traditional Brick Mud Masonry	160
22	1092	In Situ Compressive Stress Estimation Using Flatjack Technique : Case Study of Pujari Math, Dattatreya Square, Bhaktapur	167
23	1096	Numerical Runout Modelling of a Glaciated Debris Avalanche in the Himalaya: A Preliminary Analysis	176

S.N.	ID	Title	Page
24	1097	Analysis of Timber Reinforced Masonry in Historic Monuments	181
25	1104	Performance of Lime Mortar in Reconstruction of Monuments of Bhaktapur	185
26	1115	Site-specific Ground Response Analysis of Bhaktapur Municipality with Microtremor	189
27	1121	Study on the Effect of Mass and Stiffness Irregularities on Fundamental Period of Infilled RC Framed Buildings	195
28	1124	Analytical Investigation of Unreinforced Masonry Walls Strengthened using Ferrocement Overlay	204
29	1126	Comparison of Two Large Earthquakes in Nepal: The M7.8 Gorkha Earthquake and the M7.3 Dolakha Earthquake in 2015	214
30	1127	Seismic Performance of RCC Buildings with Plan Irregularity	222
31	1129	Seismic Reliability Assessment of Calibrated Concrete Gravity Dam Using High-Dimensional Model Representation and Cornell's Approach: A Case Study	230
32	1131	Chemical Properties and Fineness of OPC Cement from Various Manufacturers and Their Effect on Cement Grade – A Case Study of Nepal	240
33	1132	Performance of Timber Joint System Used in Traditional Monuments of Bhaktapur Municipality	246
34	1137	Determination of Properties of OPC Cement from Various Manufacturer – A Case Study of Nepal	254
35	1146	Behavior and Modeling of Masonry Infilled RC Frame Subjected to Column Loss Caused by Earthquake	258
36	1147	Strengthening of Nritya Vatsala Temple Using Timber Reinforcement	263
37	1148	Comparison of Recorded and Synthetic Response Spectrum Compatible Ground Motions Based on Stochastic Ground Motion Model	273
38	1151	Mud Masonry Houses in Nepal: A Study Based on Reconstruction Work After 2015 Gorkha Earthquake	282
39	1152	Micro-Tremor Measurement of Damaged Masonry Buildings in Bhaktapur After the 2015 Gorkha Earthquake in Nepal	292
40	1154	Consideration of Resiliency in Reinforced Concrete Buildings	302
41	1161	2015 Nepal Earthquake And Earthquake Resistance Structure	301
42	1170	Nepalese School Building Stock and Implications on Seismic Vulnerability Assessment	319
43	1176	Seismic Performance of Three Tiered Pagoda Style Bhairavnath Temple	329
44	1177	Seismic Response Characteristics of Partially-Filled Spherical Storage Tank	340
